I. CATALOGUE OF INTEGRAL MODULAR DATA UP TO RANK 13

This section presents a comprehensive catalogue of integral modular data (MD) up to rank 13. Notably, all the MD listed here are categorifiable, meaning each corresponds to the MD of an integral modular fusion category. These corresponding categorical models are identified in [1, Theorem 1.3]. We will begin by listing the non-pointed MD in §I.1, followed by the pointed MD in §I.2. Additionally, these data can be accessed in a machine-readable format in [2].

I.1. Non-Pointed Modular Data Up To Rank 13. The data are organized in the following sequence:

- Rank,
- Type,
- Fusion coefficients,
- List of topological spins (s_i) giving the T-matrix (see [1, Definition 2.11]),
- Cyclotomic conductor of the S -matrix,
- Cyclotomic conductor of the T -matrix (its order),
- Central charge,
- List of 2nd Frobenius-Schur indicators,
- S -matrix.

I.1.1. Rank 8, type $[1, 1, 2, 2, 2, 2, 3, 3]$, first fusion ring.

I.2. Pointed Modular Data Up To Rank 13. In light of [1, Remark 1.2], it suffices to specify only the Abelian groups and their corresponding T-matrices, which encapsulate the topological spins in this context. Let us denote by C_n the cyclic group of order n . The complete data set, akin to the format presented in §I.1, is available at [2].

- C_1 : $[0]$,
- C_2 : $[0, 1/4], [0, -1/4]$,
- C_3 : $[0, 1/3, 1/3], [0, -1/3, -1/3]$,
- C_2^2 : $[0, 1/2, 0, 0], [0, -1/4, 1/4, 0], [0, 1/2, 1/4, 1/4], [0, 1/2, 1/2, 1/2], [0, -1/4, -1/4, 1/2],$
- C_4 : $[0, 1/2, 1/8, 1/8], [0, 1/2, 3/8, 3/8], [0, 1/2, -3/8, -3/8], [0, 1/2, -1/8, -1/8]$,
- C_5 : $[0, 1/5, -1/5, -1/5, 1/5], [0, 2/5, -2/5, -2/5, 2/5]$,
